Introducing Kitchen Story: Your Personal Home Cooking Companion

Are you tired of staring at your pantry and fridge, wondering what to whip up with the ingredients you have on hand? Say hello to Kitchen Story, your go-to solution for creating mouthwatering home cooked meals using what you already have in your kitchen!

You can learn to cook with step-by-step instructions and so many recipes to choose from.

But Why Should I Use the App?

- Kitchen Story helps reduce food waste by suggesting recipes based on the ingredients you already have at home.
- By utilizing ingredients that might otherwise go unused, Kitchen Story contributes to minimizing food waste.
- According to recent statistics, approximately 30-40% of the food supply in the United States is wasted each year. Kitchen Story aims to combat this by providing practical solutions for using up ingredients.

What We Learned!

Spoonacular API

The Spoonacular API provides developers access to a comprehensive database of recipes, ingredients, and nutrition information, enabling them to build applications for recipe search, meal planning, grocery shopping, nutrition analysis, food pairing, and more.

Firebase Realtime Database

It allows real-time synchronization of tasks, enabling users to add and delete tasks seamlessly across devices. Additionally, Firebase Authentication simplifies user management, enabling secure sign-in and sign-up functionalities for your app

Live Demo

Future Plans

Users can see a randomly generated recipe

Users can play a trivia about a recipe or meal on cooking

People can comment on recipe and save recipe
